HOTSPOT

You are a SharePoint architect for Contoso, Ltd. The environment has the following servers:

You must support a streamlined topology.

You need to design the distribution of services and other components in the farm.

Use the drop-down menus to select the answer choice that answers each question.

Hot Area:

**Answer:**

Explanation:

Explanation/Reference:

\* Business Data Connectivity services should be placed on the Front-end servers.

We include the SPServer1 which has the distributed cache.

\* The Word Automation Service should be placed on the Batch application server.

\* Microsoft SharePoint Foundation Subscription Settings Service should be placed on the Web server or application server. Here we use the web servers SPWeb1 and SpWeb2.

Note: Streamlined topologies - The distribution of services and other components in a farm is intended to maximize system resources of server hardware. Streamlined architectures include front-end servers, batch-processing servers, and database servers.
