After you purchased, you will get the right of free update your 500-750 prep4sure pdf one-year, Now make the achievement of Cisco Cisco Certification 500-750 Sfjbs certification easy by using these 500-750 exam questions dumps because the success is in your hands now.

NEW QUESTION: 1

An important application has been migrated to a database on an X5 Database Machine.

You are examining high-load SQL statements from this application, in an attempt to determine which ones will benefit from the Exadata Smart Scan capability.

Which three access paths always generate "cell single block physical read" or "cell multiblock physical read" requests?

- A.** Index fast full scans executed in parallel
- B.** Full table scans on heap organized tables executed in parallel
- C.** Index unique scan access by primary key to heap organized tables executed in parallel
- D.** Full table scans on index organized tables executed in parallel
- E.** Full table scans on heap organized tables executed serially
- F.** Index unique scan access by primary key to heap organized tables executed serially

Answer: A,E,F

NEW QUESTION: 2

Your network contains an Active Directory domain. The domain contains an enterprise certification authority (CA) named Server1 and a server named Server2.

On Server2, you deploy Network Policy Server (NPS) and you configure a Network Access Protection (NAP) enforcement policy for IPsec.

From the Health Registration Authority snap-in on Server2, you set the lifetime of health certificates to four hours.

You discover that the validity period of the health certificates issued to client computers is one year.

You need to ensure that the health certificates are only valid for four hours.

What should you do?

- A.** Modify the Request Handling settings of the certificate template used for the health certificates.
- B.** On Server1, run certutil.exe -setreg policy\editflags +editf_attributeenddate.
- C.** Modify the Issuance Requirements settings of the certificate template used for the health certificates.
- D.** On Server1, run certutil.exe Csetregdbflags +dbflags_enablevolatilerequests.

Answer: B

Explanation:

Configure template validity period override

Use the following procedure to allow the CA to issue the new health certificate template.

This procedure applies to an enterprise NAP CA only.

To allow template validity period override

On the NAP CA, click Start, click Run, right-click Command

Prompt, and then click Run as administrator.

In the command window, type Certutil.exe -setreg policy\EditFlags

+EDITF_ATTRIBUTEENDDATE, and then press ENTER.

In the command window, type net stop certsvc && net start certsvc, and then press ENTER.

Verify that Active Directory Certificate Services (AD CS) stops and starts successfully.
