Understand the Questions and Answers, We help many candidates Valid Test 312-39 Vce Free who are determined to get dreaming certifications, They've passed masters degrees from UK and USA, If you buy the 700-150 study materials from our company, we can make sure that you will have the right to enjoy the 24 hours full-time online service.

With the Software version of our 700-150 study materilas, you can have the experience of the real exam which is very helpful for some candidates who lack confidence or experice of our 700-150 training guide.

We support "Full Refund" unconditionally if you cannot pass exam with our 700-150 exam cram in one year, Please feel free to contact our 24/7 available support team if you have any questions about our 700-150 pass exam.

NEW QUESTION: 1
You manage an Active Directory domain named contoso.local. You install Azure AD Connect and connect to an Azure Active Directory (Azure AD) tenant named contoso.com without syncing any accounts.
You need to ensure that only users who have a UPN suffix of contoso.com in the contoso.local domain sync to Azure AD.
What should you do?
A. Use Azure AD Connect to customize the synchronization options.
B. Use Synchronization Service Manager to modify the Active Directory Domain Services (AD DS) Connector.
C. Use the Synchronization Rules Editor to create a synchronization rule.
D. Use the Synchronization Service Manager to modify the Metaverse Designer tab.
Answer: C
Explanation:
Explanation

Filtering what objects are synced to Azure AD is a common request and there are many instances where filtering by OU just doesn't cut it. One option is to filter users by their UPN suffix so that only users with the public FQDN as their UPN suffix are synced to Azure AD (e.g., would be synced while would not). Filtering can be configured using either the GUI or PowerShell.
Through GUI:
Using The Synchronization Rules Editor
1. Open the Synchronization Rules Editor on the server where Azure AD Connect is installed.

2. Click the Add new rule button on the View and manage your synchronization rules window.
3. Fill out the appropriate fields on the Description tab and click Next >.
4. On the Scoping filter tab, click Add group, then Add clause, add a userPrincipalName attribute filter, and click Next >.
Attribute: userPrincipalName
Operator: ENDSWITH
Value: Your internal UPN suffix prefixed with @ (e.g., @internal.acme.com). Users with this UPN suffix will NOT be synced with Office 365.
