NEW QUESTION: 1

Brad Thomas is a former patient at Alabama General Hospital. He came to the HIM Department today and asked for a list of people who have requested his medical records over the past 10 years. He also wants to know what was released. Which is the appropriate response to Brad's request?

- A. Give him what he requested.
- B. Give him the information on records released over the past 6 years.
- C. Give him his medical record and let him find out who requested information for himself.
- D. Do not give him any information.

Answer: B

NEW QUESTION: 2

What are the Popular destinations for syslog messages to be saved?

- A. The console terminal
- B. Syslog server
- C. Flash
- D. Other terminals
- E. The logging buffer .RAM

Answer: A,B,E

Explanation:

By default, switches send the output from system messages and debug privileged EXEC commands to a logging process. The logging process controls the distribution of logging messages to various destinations, such as the logging buffer (on RAM), terminal lines (console terminal), or a UNIX syslog server, depending on your configuration. The process also sends messages to the console.

Note: Syslog messages can be written to a file in Flash memory although it is not a popular place to use. We can configure this feature with the command logging file flash:filename.
