Most candidates have no much time to preparing [C-THR81-2105](#) the SAP Certified Application Associate - SAP SuccessFactors Employee Central Core 1H/2021 vce dumps and practice SAP Certified Application Associate - SAP SuccessFactors Employee Central Core 1H/2021 real questions.

NEW QUESTION: 1

Which two demonstrate the valid usage of the keyword synchronized?

- A.**

```
class ThreadSafe {
synchronized static void soIt () {}
}
```
- B.**

```
abstract class ThreadSafe {
synchronized abstract void doIt();
}
```
- C.**

```
enum ThreadSafe {
ONE, TWO, Three;
```

```
Synchronized final void doIt () {}  
}
```

D. interface ThreadSafe { synchronized void doIt(); }

Answer: A,B

Explanation:

The Java programming language provides two basic synchronization idioms:
synchronized methods and synchronized statements.

Example:

To make a method synchronized, simply add the synchronized keyword to its declaration:

```
public class SynchronizedCounter {  
    private int c = 0;  
    public synchronized void increment() {  
        c++;  
    }  
    public synchronized void decrement() {  
        c--;  
    }  
    public synchronized int value() {  
        return c;  
    }  
}
```

Incorrect:

A: An interface in the Java programming language is an abstract type that is used to specify an interface (in the generic sense of the term) that classes must implement. Interfaces are declared using the interface keyword, and may only contain method signature and constant declarations (variable declarations that are declared to be both static and final). An interface may never contain method definitions.

D: An enum type is a special data type that enables for a variable to be a set of predefined constants. The variable must be equal to one of the values that have been predefined for it. Common examples include compass directions (values of NORTH, SOUTH, EAST, and WEST) and the days of the week.

NEW QUESTION: 2

Which two statements are true about setting the FAST_START_MTTR_TARGET initialization parameter to a nonzero value? (Choose two.)

- A.** The value for the LOG_CHECKPOINT_INTERVAL initialization parameter will be override the value for FAST_START_MTTR_TARGET
