By familiarizing ourselves with the objective domain of each exam, [New DES-6332 Exam Bootcamp](#) we can determine which test to train for in order to best cover our career path, Sometimes choice is more important than choice.

NEW QUESTION: 1

Scenario:

Following the merger of two online entertainment companies, management is integrating the two distinct service systems that were individually built and optimized prior to the acquisition.

Reducing IT costs is a major goal, but the company also wants a system infrastructure that allows quick, flexible handling of the online content requests, and that is highly reliable and has excellent expandability. The newly merged company is expanding its web-based music entertainment services by establishing a mobile content business model and launching a comprehensive community site that allows multiple consumers access to content in collaboration with PCs and cell phones. The multiple consumer web service includes video files, which occupy 90% or more of the total capacity and require an average of 400 Mbps network bandwidth for content distribution. These files place a heavy burden on the distribution system, and this has prompted the company to consider a virtual server environment. They need to achieve this without lowering service quality.

Some of the additional business criteria identified in customer planning interviews includes:

- Twenty or more physical servers need to be integrate into just three units
- The storage environment, previously structured as individual server units, requires shifting to shared storage using a Storage Area Network (SAN)
- Increase the overall system reliability by consolidating the system environment.
- Not interested in direct-attached storage. Shared storage makes it possible to increase usage efficiency above that offered by direct-attached storage, and also adds a cost advantage.
- Management of all storage, HBAs, and switches should be done from a GUI-based dashboard .
- Multiple solutions, prioritized with a recommendation

Refer to the scenario:

The company prefers to migrate to a Fibre Channel storage system. Which array will support this requirement?

- A. HP StoreAll 9730
- B. HP StoreVirtual 4330
- C. HP StoreSure 2000
- D. HP StoreOnce 6200

Answer: B

NEW QUESTION: 2
