Explanation:
The length of one side of a square is equal to the square root
of the area of the square. Since the area of the squares is 9,
16, and 25, the lengths of the sides of the squares are 3, 4,
and 5, respectively. The triangle is formed by the sides of the
three squares; therefore, the perimeter, or distance around the
triangle, is 3 + 4 + 5 = 12.
