Are you worried about C\_ARCIG\_2202 exam, Learning of our C\_ARCIG\_2202 practice materials is the best way to stop your busy life, Try free C\_ARCIG\_2202 exam demo before you decide to buy.

**NEW QUESTION: 1**

Information Security management is a process of defining the security controls in order to protect information assets. The first action of a management program to implement information security is to have a security program in place. What are the objectives of a security program? Each correct answer represents a complete solution. Choose all that apply.

- A. System classification
- B. Security education
- C. Security organization
- D. Information classification

**Answer: B,C,D**

Explanation:

Explanation/Reference:

Explanation: The first action of a management program to

implement information security is to have a security program in place. The objectives of a security program are as follows: Protect the company and its assets Manage risks by identifying assets, discovering threats, and estimating the risk Provide direction for security activities by framing of information security policies, procedures, standards, guidelines and baselines Information classification Security organization Security education AnswerC is incorrect. System classification is not one of the objectives of a security program.

**NEW QUESTION: 2**

An attempt was made by the Domino administrator to delete the ID vault on the Domino server. The vault was currently in use so the deletion was halted. Which of the following server commands will attempt to process the deletion again?

- A. show idvaults
- B. load idvault update -remove
- C. tell idvault process delete
- D. tell idvault delete &lt;vaultname&gt;

**Answer: A**

**NEW QUESTION: 3**

Your organization is preparing for a security assessment of your use of AWS. In preparation for this assessment, which three IAM best practices should you consider implementing? Please select:

- A. Assign IAM users and groups configured with policies granting least privilege access
- B. Ensure all users have been assigned and are frequently rotating a password, access ID/secret key, and X.509 certificate When you go to the security dashboard, the security status will show the best practices for initiating the first level of security.
- C. Configure MFA on the root account and for privileged IAM users
- D. Create individual IAM users

**Answer: A,C,D**

Explanation:

Option D is invalid because as per the dashboard, this is not part of the security recommendation For more information on best security practices please visit the URL:

<https://aws.amazon.com/whitepapers/aws-security-best-practices;>  
The correct answers are: Create individual IAM users, Configure MFA on the root account and for privileged IAM users. Assign IAM users and groups configured with policies granting least privilege access Submit your Feedback/Queries to our Experts
