The test practice software of C_THR81_2111 study materials is based on the real test questions and its interface is easy to use, I believe you must want to get more opportunities.

NEW QUESTION: 1

Your company uses Office 365 and has an Enterprise E3 plan. The company has a Microsoft SharePoint Online public website that is currently configured to use the onmicrosoft.com domain name. The company purchases a new domain name. You need to change the address of the SharePoint Online public website to the new domain name.

What should you do first?

- A. In the Office 365 admin center, add the new domain.
- B. In the SharePoint Online Administration Center, add the new domain.
- C. Create a new public website and assign it to the new domain.
- D. Create a new site collection and assign it the new domain.

Answer: A

Explanation:

Explanation/Reference:

Explanation:

When you purchase an Office 365 subscription and configure a Microsoft SharePoint Online public website, the website will use a URL like contoso.onmicrosoft.com.

If you want to use your own domain name, for example www.contoso.com, the first step is to add the domain in the Office 365 admin center. This will start a wizard which will give you the option to create a new website using the new domain name or assign the new domain name to an existing website. The last step in the wizard will tell you which DNS records you need to configure to point the new domain name to the SharePoint Online public website.

NEW QUESTION: 2

You have several devices enrolled in Microsoft Intune. You have a Microsoft Azure Active Directory (Azure AD) tenant that includes the users shown in the following table.

The device type restrictions in Intune are configured as shown in the following table.

You add User3 as a device enrollment manager in Intune. For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

Explanation

NEW QUESTION: 3

You have an Azure Storage account named storagel. You have an Azure App Service app named appl and an app named

App2 that runs in an Azure container instance. Each app uses a managed identity.

You need to ensure that App1 and App2 can read blobs from storage1 for the next 30 days.

What should you configure in storage1 for each app?

Answer:

Explanation:

Explanation

With Shared access signature you can limit the resources for access and at the same time can control the duration of the access.

A shared access signature (SAS) provides secure delegated access to resources in your storage account without compromising the security of your data. With a SAS, you have granular control over how a client can access your data. You can control what resources the client may access, what permissions they have on those resources, and how long the SAS is valid, among other parameters.

<https://docs.microsoft.com/en-us/azure/storage/common/storage-sas-overview>

NEW QUESTION: 4

HOTSPOT

Note: This question is part of a series of questions that use the same scenario. For your convenience, the scenario is repeated in each question. Each question presents a different goal and answer choices, but the text of the scenario is exactly the same in each question in this series.

You are a database administrator for a company that has an on-premises Microsoft SQL Server environment and Microsoft Azure SQL Database instances. The environment hosts several customer databases, and each customer uses a dedicated instance. The environments that you manage are shown in the following table.

You need to configure auditing for the Adventure Works environment.

How should you complete the Transact-SQL statement? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Hot Area:

Answer:

Explanation:

Explanation/Reference:

Explanation:

Box 1: CREATE SERVER AUDIT

Create the server audit.

You must implement auditing to record access to data that is considered sensitive by the company.

Create database audit

Box 2: ALTER SERVER AUDIT

Enable the server audit.

Box 3: CREATE DATABASE AUDIT

Create the database audit specification.

Box 4: FOR SERVER AUDIT

You must implement auditing for all objects in the ADVSchema.
