NEW QUESTION: 1

Your customer needs an HP service offering with an assigned support team, 4-hour on-site response time, and 2-hour software support response time at the lowest cost. Which HP service do you offer?

- A. Support Plus 24
- B. Proactive 24
- C. Support Plus
- D. Critical Service

Answer: B

NEW QUESTION: 2

BGP AS_PATH attribute is an optional transitive attribute.

- A. FALSE
- B. TRUE

Answer: A

NEW QUESTION: 3

Exhibit: /etc/dfs/dfstab file # Place share(1M) commands here for automatic execution # on entering init state 3. # # Issue the command /etc/init.d/nfs.server start to run the NFS # daemon processes and the share commands, after adding the very # first entry to this file. # # share [-F fstype] [-o options] [-d <text>] <pathname> [resource] # .e.g, # share -F nfs -o rw=engineering -d home dirs /export/home2 share -F nfs /usr/share/man share -F nfs -o ro /export/share share -F nfs /var/tmp

Which command makes the /export/share resource unavailable for clients to mount, without affecting any other shared resources?

- A. share /export/share
- B. unshare -F nfs /export
- C. umount /export/share
- D. unshareall
- E. unshare /export/share

Answer: E

NEW QUESTION: 4

Which of the following access control models requires defining classification for objects?

- A. Discretionary access control
- B. Role-based access control
- C. Identity-based access control
- D. Mandatory access control

Answer: D

Explanation:

Explanation/Reference:

With mandatory access control (MAC), the authorization of a subject's access to an object is dependant upon labels, which indicate the subject's clearance, and classification of objects.

The Following answers were incorrect:

Identity-based Access Control is a type of Discretionary Access Control (DAC), they are synonymous.

Role Based Access Control (RBAC) and Rule Based Access Control (RuBAC or RBAC) are types of Non Discretionary Access Control (NDAC).

Tip:

When you have two answers that are synonymous they are not the right choice for sure.

There is only one access control model that makes use of Label, Clearances, and Categories, it is Mandatory Access Control, none of the other one makes use of those items.

Reference(s) used for this question:

KRUTZ, Ronald L. & VINES, Russel D., The CISSP Prep Guide: Mastering the Ten Domains of Computer Security, John Wiley & Sons, 2001, Chapter 2: Access control systems (page 33).
