So our DP-500 test prep will not occupy too much time.

NEW QUESTION: 1

- A. Option E
- B. Option C
- C. Option D
- D. Option B
- E. Option A

Answer: D,E

Explanation:

A: Cloneable Domain Controllers Group (located in the Users container).

Membership in this group dictates whether a DC can or cannot be cloned.

This group has some permissions set on the domain head that should not be removed. Removing these permissions will cause cloning to fail.

Also, as a best practice, DCs shouldn't be added to the group until you plan to clone and DCs should be removed from the group once cloning is complete. Cloned DCs will also end up in the Cloneable Domain Controllers group.

B: DCCloneConfig.xml is an XML configuration file that contains all of the settings the cloned DC will take when it boots. This includes network settings, DNS, WINS, AD site name, new DC name and more.

NEW QUESTION: 2

Which part of a hybrid cloud-based deployment with Cisco Webex Messenger Service is used for meeting capabilities?
