Answer: D,E

NEW QUESTION: 3
You design a Business Intelligence (BI) solution by using SQL Server 2008. The solution will contain a total
of 100 different reports created by using Report Definition Language (RDL).
Each report must meet the following requirements:
-Display a common set of calculations based on a parameter value.
-Provide a method for setting values on a report URL or in a subscription definition that are not exposed to a
user.
-The business rules for all reports that determine the calculations change frequently.
You need to design a solution that meets the requirements. You need to perform this action by using the
minimum amount of development and maintenance effort.
What should you do?
A. Implement the function in the <Code> element of each report.
B. Create hidden parameters in each report.
C. Create internal parameters in each report.
D. Implement the function in a custom assembly. Reference the assembly in each report.
Answer: D
