That means if you study our study guide, your passing rate is [ISO-9001-CIA](#) much higher than other candidates, The efficiency of going it alone is very low, and it is easy to go to a dead end.

NEW QUESTION: 1
A husband and wife and their two children, age 9 and age 5, are requesting family therapy.
Which of the following strategies is most therapeutic for the nurse to use during the initial interaction with a family?
A. Allow family members to assume the seats as they choose.

B. Encourage the mother to speak for the children.
C. Always allow the most vocal person to state the problem first.
D. Interpret immediately what seems to be going on within the family.
Answer: A
Explanation:
(A) One will always hear what the most vocal person has to say. It is best to start with the quietest family member to encourage that person to express emotions. (B) All family members are encouraged to speak for themselves. (C) In the initial family assessment, only data collection occurs; interpretations are made later. (D) Allowing family members to choose their own seats will assist the nurse in assessing the family system and in determining who feels closer to whom.

NEW QUESTION: 2
A customer wants to deploy more efficient switching for the VMware vSphere platform. Which of these shouldbe proposed as a solution?
A. Deploy server blades in a single chassis
B. Deploy servers with a large amount of memory.
C. Use only 10GE connectivity.
D. Use a Cisco UCS VIC M81KR mezzanine card.
Answer: D
Explanation:
Explanation/Reference:
The Cisco UCS VIC M81KR Virtual Interface Card is a type of adapter, or mezzanine card, available in a Cisco UCS blade server that directly supports virtualization. It supports NIC virtualization for either a single operating system or for VMware ESX. Inside a single operating system, each VIC is presented as a physical adapter. For VMware, a special feature allows the VIC to be presented directly to the guest operating system, bypassing the VMware virtual switch layer. This allows efficiency and also allows the Cisco UCS to reconfigure network infrastructure if virtual machines migrate between ESX server instances on different blade servers.
