NEW QUESTION: 4

Bei der Ermittlung einer frühesten Projektabschlusszeit, die durch Zahlung einer Prämie für den vorzeitigen Abschluss erzielt werden soll, sollten folgende Aktivitäten ausgewählt werden:

- A. Die Summe der Pausenzeiten ist die kürzeste.
- B. Die Summe der Aktivitätszeiten ist die kürzeste.
- C. Dies ergibt die längstmögliche Ausführungszeit.
- D. Diese haben keine Nachlaufzeit.

Answer: D

Explanation:

Erläuterung:

Die Aktivitätszeit eines kritischen Pfads ist länger als bei jedem anderen Pfad durch das Netzwerk. Dieser Pfad ist wichtig, da, wenn alles wie geplant verläuft, seine Länge die kürzestmögliche Ausführungszeit für das Gesamtprojekt ergibt. Aktivitäten auf dem kritischen Pfad werden zu Kandidaten für Abstriche, d. H. Zur Verkürzung ihrer Zeit durch Zahlung einer Prämie für die vorzeitige Fertigstellung.

Aktivitäten auf dem kritischen Pfad haben eine Nachlaufzeit von Null, und umgekehrt befinden sich Aktivitäten mit einer Nachlaufzeit von Null auf einem kritischen Pfad. Durch sukzessives Entspannen von Aktivitäten auf einem kritischen Pfad kann eine Kurve erhalten werden, die die Gesamtkosten des Projekts im Verhältnis zur Zeit anzeigt.
