And our NSE7_PBC-6.4 study guide can be your work assistant.

NEW QUESTION: 1

A. Option D
B. Option C
C. Option A
D. Option B
Answer: A
Explanation:
Explanation
A Virtual Private Cloud (VPC. is a virtual network dedicated to the user's AWS account. A user can create a subnet with VPC and

launch instances inside the subnet. The user can create a subnet with the same size of VPC. However, he cannot create any other subnet since the CIDR of the second subnet will conflict with the first subnet. The user cannot modify the CIDR of a subnet once it is created. Thus, in this case if required, the user has to delete the subnet and create new subnets.
