NEW QUESTION: 1
HOTSPOT
A company plans to synchronize users in an existing Active Directory organizational unit with Office 365.
You must configure the Azure Active Directory Connect with password sync You need to ensure that the service account has the minimum level of permissions required.

Which two permission levels should you assign to the account
for each task? To answer, select the appropriate permission
level from each list in the answer area.
Hot Area:

Answer:
Explanation:

Explanation/Reference:
* Password Write-Back
For each forest you have configured in Azure AD Sync, the
account you have specified for a forest in the wizard must be
given the "Reset-Password" and "Change Password" extended
rights on the root object of each domain in the forest.
* Permissions for password synchronization
If you want to enable password synchronization between your
on-premises AD DS and your Azure Active Directory for your
users, you need to grant the following permissions to the
account that is used by Azure AD Sync to connect to your AD DS:
Replicating Directory Changes

Replicating Directory Changes All

NEW QUESTION: 2
You manage an application that has a front-end tier, a middle
tier, and a back-end tier.
Each tier is located on a different subnet.
You need to apply access to and between the tiers as follows:
* Only the front-end tier must be able to access the Internet.
* You must permit network access between the front-end tier and
the middle tier.
* You must permit network access between the middle tier and
the back-end tier.
* You must prevent all other network traffic.
You need to apply this configuration to all virtual machines
inside the subnets.
What should you do?
A. Add an Availability Set.
B. Add a regional VNET.
C. Add a VPN gateway.
D. Use a Network Security Group (NSG).
Answer: A
Explanation:
