Professional-Cloud-DevOps-Engineer: Google Cloud Certified - Professional Cloud DevOps Engineer Exam Real Testing Environment

We are providing 3 Months updates Free, I believe

**Professional-Cloud-DevOps-Engineer Real Testing Environment**

that you will be more inclined to choose a good service product, such as Professional-Cloud-DevOps-Engineer learning question Our Professional-Cloud-DevOps-Engineer exam preparation materials have a higher pass rate than products in the same industry.

The 99.8% pass rate and high score of Professional-Cloud-DevOps-Engineer exam study plan has help lots of IT candidates achieve their goals, Before you really attend the Professional-Cloud-DevOps-Engineer exam and choose your materials, we want to remind you of the importance of holding a certificate like this one.

Professional-Cloud-DevOps-Engineer online test engine is suitable to all kinds of equipment or digital devices, To help all of you to get the most efficient study and pass Google Professional-Cloud-DevOps-Engineer the exam is the biggest dream we are doing our best to achieve.

If by any chance you fail the exam we will full refund all the dumps cost to you soon, So if you are serious about Professional-Cloud-DevOps-Engineer real dumps, why don't you choose guaranteed study guide to prepare and clear it just for one time?

**NEW QUESTION: 1**

A company is planning to deploy a wireless guest access with anchor controller. Which two WLC platforms can support the required function? (Choose two.)

- A. Cisco 2504 WLC
- B. Cisco 5505 WLC
- C. Cisco Wireless LAN Controller Module for Cisco Integrated Services Routers
- D. Cisco 7500WLC
- E. Cisco Virtual Wireless Controller

**Answer: A,B**

**NEW QUESTION: 2**

A customer's product catalog database contains approximately 50,000 individual product SKUs. The catalog is updated quarterly.

The customer needs the load on database servers to be minimized.

Which technique should a developer use to meet the customer's needs?

- A. a mapping table when loading the product catalog quarterly from the customer's database
- B. a QVD file to store the product catalog quarterly from the customer's database
- C. the BUFFER statement when loading the product catalog quarterly from the customer's database
- D. a preceding load statement when loading the product catalog quarterly from the customer's database

**Answer: B**

**NEW QUESTION: 3**

You have an Azure subscription that contains 100 virtual machines.

You regularly create and delete virtual machines.

You need to identify unused disks that can be deleted.

What should you do?

- A. From Cloudfy, open theOptimizertab and create a report.
- B. From Microsoft Azure Storage Explorer, view the Account Management properties.
- C. From Cloudfy, create a Cost Management report.
- D. From the Azure portal, configure the Advisor recommendations.

**Answer: B**

Explanation:

Explanation

You can find unused disks in the Azure Storage Explorer console. Once you drill down to the Blob containers under a storage account, you can see the lease state of the residing VHD (the lease state determines if the VHD is being used by any resource) and the VM to which it is leased out. If you find

that the lease state and the VM fields are blank, it means that the VHD in question is unused.

Note: The ManagedBy property stores the Id of the VM to which Managed Disk is attached to. If the ManagedBy property is \$null then it means that the Managed Disk is not attached to a VM

Topic 3, Humongous Insurance

Overview

Existing Environment

Active Directory Environment

Humongous Insurance has a single-domain Active Directory forest named humongousinsurance.com. The functional level of the forest is Windows Server 2012.

You recently provisioned an Azure Active Directory (Azure AD) tenant.

Network Infrastructure

Each office has a local data center that contains all the servers for that office. Each office has a dedicated connection to the Internet.

Each office has several link load balancers that provide access to the servers.

Active Directory Issue

Several users in humongousinsurance.com have UPNs that contain special characters.

You suspect that some of the characters are unsupported in Azure AD.

Licensing Issue

You attempt to assign a license in Azure to several users and receive the following error message: "Licenses not assigned.

License agreement failed for one user." You verify that the Azure subscription has the available licenses.

Requirements

Planned Changes

Humongous Insurance plans to open a new office in Paris. The Paris office will contain 1,000 users who will be hired during the next 12 months. All the resources used by the Paris office users will be hosted in Azure.

Planned Azure AD Infrastructure

The on-premises Active Directory domain will be synchronized to Azure AD.

All client computers in the Paris office will be joined to an Azure AD domain.

Planned Azure Networking Infrastructure

You plan to create the following networking resources in a resource group named All\_Resources:

- \* Default Azure system routes that will be the only routes used to route traffic

- \* A virtual network named Paris-VNet that will contain two subnets named Subnet1 and Subnet2

- \* A virtual network named ClientResources-VNet that will contain one subnet named ClientSubnet

- \* A virtual network named AllOffices-VNet that will contain two

subnets named Subnet3 and Subnet4 You plan to enable peering between Paris-VNet and AllOffices-VNet. You will enable theUse remote gatewayssetting for the Paris-VNet peerings. You plan to create a private DNS zone named humongousinsurance.local and set the registration network to the ClientResources-VNet virtual network. Planned Azure Computer Infrastructure Each subnet will contain several virtual machines that will run either Windows Server 2012 R2, Windows Server 2016, or Red Hat Linux.

#### Department Requirements

Humongous Insurance identifies the following requirements for the company's departments:

- \* Web administrators will deploy Azure web apps for the marketing department. Each web app will be added to a separate resource group. The initial configuration of the web apps will be identical. The web administrators have permission to deploy web apps to resource groups.

- \* During the testing phase, auditors in the finance department must be able to review all Azure costs from the past week.

#### Authentication Requirements

Users in the Miami office must use Azure Active Directory Seamless Single Sign-on (Azure AD Seamless SSO) when accessing resources in Azure.

#### **NEW QUESTION: 4**

Which of the following equations is used to calculate cost variance?

- A.  $AC/EV$
- B.  $AC-EV$
- C.  $EV-AC$
- D.  $AC+EV$

**Answer: C**
