Sfjbs QV12SA dumps pdf includes a number of questions and answers for the practice of the QlikView System Administrator students that will not only provide the questions for QV12SA exam but will also prepare his mind and build confidence for the real QlikView 12 System Administrator Certification Exam exam.

NEW QUESTION: 1

Your data center contains 10 Hyper-V hosts that host 100 virtual machines. You plan to secure access to the virtual machines by using the Datacenter Firewall service. You have four servers available for the Datacenter Firewall service. The servers are configured as shown in the following table.

You need to install the required server roles for the planned deployment Which server role should you deploy? Choose Two.

- A.** Server role to deploy: Network Policy and Access Services
- B.** Servers on which to deploy the server role: Server22 and Server23
- C.** Server role to deploy: Network Controller
- D.** Servers on which to deploy the server role: Server20 and Server21
- E.** Server role to deploy: Multipoint Services

Answer: B,C

Explanation:

Datacenter Firewall is a new service included with Windows Server 2016. It is a network layer, 5-tuple (protocol, source and destination port numbers, source and destination IP

addresses), stateful, multitenant firewall. When deployed and offered as a service by the serviceprovider, tenant administrators can install and configure firewall policies to help protect their virtual networks from unwanted traffic originating from Internet and intranet networks.

<https://docs.microsoft.com/en-us/windows-server/networking/sdn/technologies/network-controller/networkcontroller> Network Controller Features The following Network Controller features allow you to configure and manage virtual and physical network devices and services. i) Firewall Management (Datacenter Firewall) ii) Software Load Balancer Management iii) Virtual Network Management iv) RAS Gateway Management

<https://docs.microsoft.com/en-us/windows-server/networking/sdn/plan/installation-and-preparationrequirements-for-deploying-network-controller> Installation requirements Following are the installation requirements for Network Controller. For Windows Server 2016 deployments, you can deploy Network Controller on one or more computers, one or more VMs, or a combination of computers and VMs. All VMs and computers planned as Network Controller nodes must be running Windows Server 2016 Datacenter edition.
